MERN Stack Developer

📞 03338974965 ✉ mirh7169@gmail.com 📍 Peshawar, Pakistan

SUMMARY

I am a dedicated MERN Stack Developer with 2 years of hands-on experience in full-stack web development, proficient in building scalable web applications utilizing MongoDB, Express.js, React.js, and Node.js. I have successfully developed user-centric solutions, including healthcare management systems and e-commerce platforms. I am passionate about creating efficient, responsive, and dynamic web applications to enhance user experience.

EXPERIENCE

MERN Stack Developer

Freelance

📅 01/2022

- Developed and maintained full-stack web applications using MERN technology stack
- Collaborated with clients to gather requirements and deliver custom web solutions
- Implemented responsive designs and ensured cross-browser compatibility
- Optimized application performance and implemented best coding practices
- Delivered projects on time while maintaining high code quality standards

EDUCATION

FSC of Engineering

Global Degree College

📅 01/2020 - 01/2022

Bachelor of Software Engineering

Islamia University of Peshawar

📅 01/2022 - 01/2026

KEY ACHIEVEMENTS

Doctor Appointment Management System

Developed a comprehensive healthcare management platform enabling patients to book appointments online. Integrated real-time notification system for appointment confirmations and reminders, optimized database queries resulting in 40% faster data retrieval for appointment bookings.
